DETAILED ACTION

Election/Restrictions

Applicant questions if the restriction requirement sent on 2/23/05 replaces the requirement sent on 10/19/04. The restriction requirement sent on 2/23/05 did replace the prior one.

Applicant's election with traverse of the restriction requirement in the reply filed on 3/23/05 is acknowledged. The traversal is on the ground(s) that groups I and III fall in the same class and their search would not involve undue burden. This is not found persuasive because their search involves undue burden and the search would be different for each group even though they fall in the same classification.

The requirement is still deemed proper and is therefore made FINAL.

Claims 41-68,70-75,77,78 and 82-90 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3/23/05. As a result, claims 69, 76, and 79-81 are examined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2644

Claims 69 and 76 are rejected under 35 U.S.C. 102(e) as being anticipated by Elko, US Patent 6,041,127. In figures 22-24, Elko discloses a microphone apparatus comprising a plurality of microphones 2401-2406, diffracting structure (figure 22) and a processor 2313. the processor takes account the modifying effect of the diffracting structure (see column 14 lines 12-67).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 79 is rejected under 35 U.S.C. 103(a) as being unpatentable over Elko in view of McCormick et al, US Patent 5,808,243. Elko does not disclose that the surface of the diffracting structure has an open-cellular structure. McCormick discloses a microphone apparatus having an open celled foam shield. The foam is used for prevent the microphone from sensing noise. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify Elko to have an open-celled foam structure for the purpose of improving sound transducing.

Allowable Subject Matter

Application/Control Number: 09/465,396

Art Unit: 2644

Claims 80 and 81 are objected to as being dependent upon a rejected base claim, but

Page 4

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Brian T. Pendleton whose telephone number is (571) 272-7527.

The examiner can normally be reached on M-F 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Sinh Tran can be reached on (571) 272-7564. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
